Music Player

The ultimate medico-player

The Maysound Music Player is specially developed for the optimal reproduction of the clinically documented music MusiCure, composed and produced by Niels Eje. The player is designed especially for use in the healthcare and wellness sector.

New unique design – a wealth of applications
The Maysound Music Player is compatible with all kind of pillows and resting chairs. The player has been designed with an organic form to blend in with its surroundings.

Easy to use
The Maysound Music Player has a simple and intuitive interface with backlight for night use, which makes it easy for everyone to operate. Self-dosing is an option with remote control (optional accessory).

Hygienic and robust materials
Soft PUR material in high-quality design ensures high hygiene standards and ease of cleaning for hospital use. The product has been tested and approved by hygiene nurses.

Outstanding sound quality
Many years of research and the cooperation with MusiCure, build-in high quality loudspeakers and electronics for sound optimization ensure the highest possible sound quality in the treatment situation.

High-quality rechargeable batteries
With its medically approved adaptor the integrated rechargeable batteries are charged quickly. The Maysound Music Player operates for more than 20 hours per charge.

Music stored on SD card
One hour of the music treatment program "MusiCure for Relaxation" is included.

Special treatment programs with MusiCure

MusiCure – 'music as medicine' – is specially composed and scientifically documented music, created by the composer Niels Eje in close collaboration with International researchers. MusiCure is an integrated part of the Maysound Music Player, and the special treatment programs are focused on relaxation, surgery procedures, recovery and inducing sleep. The MusiCure programs will be available on copyright-secured SD cards.
